

2011–13 AHS and 1995 NNS food classification concordance file

This file cross references food groups reported in the 2011–13 Australian Health Survey with food groups reported in the 1995 National Nutrition Survey. The file was developed to allow users to compare consumption between the two surveys. For each 3 digit group in the 2011–13 AHS, the file lists the corresponding 1995 NNS groups or individual foods. Note that in some cases, a 1995 group has been split between two 2011–13 AHS groups.

Column Heading	Description of data
2011–13 Sub-major Food Group Code	AHS specific 3 digit numeric classification code. 3 digit codes represent sub-major food groups.
2011–13 Sub-major food group name	General name used to describe the classification code.
1995 Food group code or food code	1995 NNS specific 3, 4 or 8 digit numeric classification code. 3 digit codes represent sub-major food groups. 4 digit codes represent minor food groups. 8 digit codes represent individual foods.
1995 food group name or food name	General name used to describe the classification code.
